NHSE
National HPCC Software Exchange
As part of the research in enabling technologies for the NHSE, Argonne is building a toolkit for exploring advanced web resource management technologies. Our toolkit will support hunting and gathering web pages (http, ftp, gopher), compression, indexing, transaction monitoring, parallel search and a rich language environment for developing agents. The focus of the toolkit is on discovery, distribution and managment of software (code) assets as opposed to text, images or video.
NHSE Parallel Web Engine
Agent Testbed Search Environment
Mapping and Monitoring Tools
Nexus-Perl, Agent Language and Tools
