
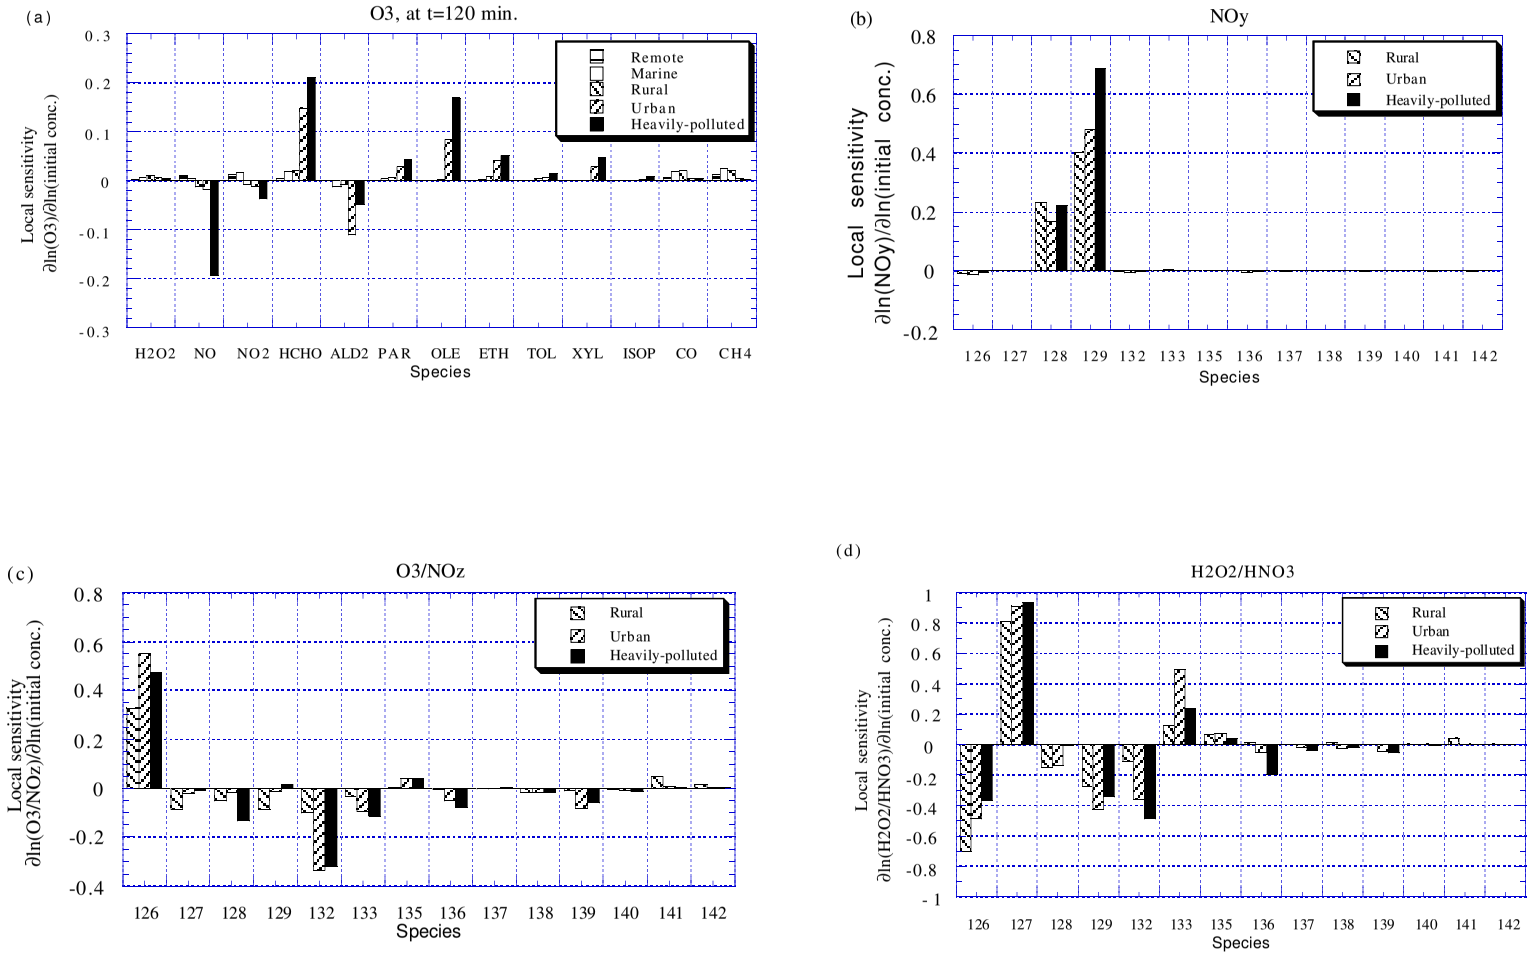

Figure 3. The sensitivities of (a) O_3, (b) NOy, (c) O_3/NO_z and (d) H_2O_2/HNO_3 with respect to initial species concentrations under various clear air conditions. The sensitivities shown are instantaneous values at the end of the 2-hr simulation for O_3 and 1-hr average values during the last hour simulation for NO_y, O_3/NO_z and H_2O_2/HNO_3.
